

Pursuant to the EU Directive on electronic communications and Provision 229 of 8 May 2014 issued by the Guarantor for the Protection of Personal Data, the use of cookies to obtain your data is subject to your consent.

Therefore, Fabrica is providing you with the following information about the use of cookies on our websites.

What are cookies and why are they used?

A cookie is a short text string that is sent to your browser and is then saved on your computer or mobile device whenever you visit a website. We use cookies for various purposes: for example, to offer you a fast and secure digital experience, to allow you to keep your connection open to the protected area while you are navigating the website pages, to safely save your user ID and password, and to identify the site pages you have visited to avoid proposing them again.

The cookies saved on your computer cannot be used to obtain any data from your hard disk, transmit computer viruses or identify and use your email address. Every cookie is unique in relation to the browser and device you use to access the Fabrica site. Some of the functions performed by cookies can also be handled by other technologies. In this document the term "cookie" refers to cookies and similar technologies.

What types of cookies are used?

We use Google Analytics to analyse the use of this website. Google Analytics generates statistical and other information about website use by means of cookies, which are stored on users' computers. The information generated relating to our website is used to create reports about the use of the website. Google will store this information. Google's privacy policy is available at: <http://www.google.com/privacypolicy.html>.

Managing your cookie preferences

You can set up and manage your cookie preferences through the Benetton site and/or through your browser settings.

If you would like to block or delete cookies received from the Fabrica website or any other website, you can do this by changing the settings on your browser through the "Help" or "Guide" function. Remember that if you choose to disable all cookies, the strictly necessary, functionality and performance cookies will also be blocked, which could hinder you navigation on the Fabrica website. For example, you will be able to visit the site's advertising pages, but you may not be able to access your shopping cart and make online purchases.

Please remember that cookie preferences on the Fabrica site will not be active on non-Fabrica websites.
